

VERMONT WORKING LANDS ENTERPRISE INITIATIVE

Elmore Roots Fruit Tree and Berry Nursery

Elmore, VT

Elmore Roots Fruit Tree and Berry Nursery was founded in 1981 on five acres in Elmore Vermont to identify, test and grow varieties of fruits and nuts that can survive and thrive in Vermont's climate. They select the best of these varieties and propagate them so Vermonters can share in our knowledge and success. Today Elmore Roots encompasses 18 acres and in our 34th year continues to set an example of what can be grown in our northern climate.

Elmore Roots Fruit and Nut Huts project will further their goal of increasing sales of their plants to more Vermonters by expanding accessibility to their hardy and proven fruits, nuts and berries. They will do this by placing kiosks (Fruit and Nut Huts) that will showcase selected varieties of their plants in three accessible commercial locations frequented by those interested in transforming lawns and marginal areas into perennial fruit and nut production.

Total Working Lands Grant—\$12,000.00

Total Match provided by Elmore Roots—\$6,028.00
